May presentation

Stephen Petty will give a presentation on the rarity of CAC'd Seated coinage. This presentation is an overview of an article being published in the next issue of *The Gobrecht Journal*. CAC, or the Certified Acceptance Corp., is a company that reviews coins in PCGS and NGC holders and determines if they are above average for the grade. If they are above average, a green sticker (green bean) is placed on the holder. If they are exceptional for the grade, a gold sticker (gold bean) is placed on the holder. CAC-stickered coins tend to receive premiums both in buying and selling, so they have become another way of evaluating whether one is acquiring a coin good for the grade.

Stephen has determined the percentage of PCGS and NGC mint-state Seated coins that have received CAC beans (5¢, 10¢, 20¢, 25¢, 50¢, Seated \$1 and Trade \$) for all dates and mintmarks. He had also been provided with a portion of the CAC database to determine the percentage of all Seated coins that have been sent to CAC for evaluation. Using this information, he has also determined the number of Seated coins that might receive CAC stickers.
